## PLASTIC MESH NETTING

### Predator barrier

Predator control can be a significant problem for outdoor fish farmers. After years of experimenting for long term solutions, the industry has determined only a physical barrier can guarantee that predators are kept out. That is why we offer this animal barrier netting.

Lightweight, black plastic netting is easily supported by plastic wire, forming a low-cost bird and small animal barrier (the larger the mesh, the lower the wind load). UV-resistant to last at least four years in the tropics.

## PREMIUM PREDATOR NETTING

This 2" x 2" square bird netting is truly top shelf. Its woven nylon material is easier to work with than solid strand materials. Orders larger than 2,000 ft<sup>2</sup> are custom cut to your exact specifications, so you won't buy what you don't need. It's rated at approximately 100 lbs of tensile strength and can last five years or more.

### ◀ POLYCLIPS

These unique fasteners are ideal for attaching predator netting and shade cloth to support rope and wires. Constructed of tough polypropylene, they can be used over and over again. Simply snap over the edge of the material and attach to  $\frac{3}{8}$ " support wire. Recommended spacing is one polyclip per 2' (depending on load).

### SHADE CLOTH

Our premium shade cloth is the knitted type, which will last over 15 years in the tropical sun. This cloth is useful for shading tanks to reduce algae, prevent sun damage to fish and reduce water temperature. It is also useful for predator control, visibility screening and, of course, shading plants.

Offered in 3 densities to block 30, 50 or 70% of the sun. Made of UV-resistant plastic. Sold in 10' L increments or full 300' rolls only.

### ◀ POLYPROPYLENE NETTING

This black, woven polypropylene netting can be used for many applications, including fish cages and predator control. The knotless design prevents injury to fish.

The square mesh predator netting is one of the highest quality made. Whether covering a large pond or small raceway, this netting will provide a good physical barrier. It is highly UV-resistant.

Smaller mesh sizes may be used for predator control but also make ideal material for fish cages. All sizes can ship Ground.
